

# Specialist Pharmacy Bags

A full range of bags to meet the specialised needs of Hospital Pharmacy.

Whether you need to protect preparations from light, transport medicines to patients or dispose of cytotoxic waste, a bag is available in various sizes to suit your needs.

- ✓ Light inhibiting bags for protecting light sensitive solutions
- ✓ Chemo-Trans-Waste Bags for the transportation of cytotoxics or the disposal of chemotherapy waste
- ✓ Sterile resealable bags for use within the isolator
- ✓ Tamper evident bags for security
- ✓ Intrathecal and Vinca Alkaloid Bags for clear labelling
- ✓ Isolator Waste Bags for non-sharps waste

### Light Inhibiting Bags

Ultra violet light can cause oxidation, hydrolysis and loss of potency of sensitive medications in solution. Light inhibiting bags offer a fast and cost effective solution, effectively filtering out 96.7% of UV rays. The bags are available in a range of sizes in resealable or plain bag styles.

### Chemo Bags

These 400 gauge strong tamper evident bags are fully labelled for convenient packing and transportation of chemotherapy preparations. Available sterile and individually wrapped or non-sterile, the bags offer a versatile and cost effective option for packing and transportation of cytotoxic preparations. The sterile bags can be taken into the aseptic area to collect cytotoxic contaminated non-sharps waste for safe disposal.

### Sterile resealable Bags

The A4 sterile resealable bags provide a convenient alternative for packing or documentation in the aseptic area or within the isolator cabinet.

### MedTrans bag

Large 12" x 18" bag ideal for packing medications and pharmaceuticals or for the collection of waste in critical areas.

### Intrathecal Bag

The Intrathecal Bags substantially reduce the risk of confusion when labelling and transporting Intrathecal injections.

### Vinca Alkaloid Bags

An alternative solution to the clear labelling of Vinca Alkaloid preparations.

### Isolator Waste Bags

Sterile and individually wrapped the isolator waste bags will fit the waste port on the isolator for easy removal of non-sharps waste.
