Title: New Alcorub sanitising gel

Helapet are delighted to announce that new Alcorub Sanitising Gel has been added to the SteriClean range of cleaning and disinfection products.

Alcorub has been specifically formulated for the aseptic Cleanroom and pharmaceutical markets. The alcohol blend controls microbial contamination commonly found in Cleanroom environments and evaporates quickly leaving no sticky residues.

Tested to BS EN 1500:1997, alcorub contains lanolin free emollients that leave hands feeling soft and nourished making sore and dry hands a thing of the past even after repeated use.

Alcorub hand gels should be used in accordance with infection prevention and control guidance for the NHS and our hand cleaning protocol can be downloaded from www.helapet.co.uk
